José Tiberius is the main author of Molwick publisher books.

With over 40 million visitors and two million books downloaded in PDF format, he is surely one of the most widely read authors in Spanish of scientific essays in the current millennium.

There are more than 10000 links to Jose's website, where his books on theoretical physics, theory of evolution, quantitative genetics, cognitive theory, and philosophy of science, metaphysics and children's stories are showcased in five languages. Many of these links –to all these different fields– come from universities, projects done by university students and blogs created by teaching professionals and Educational specialists.

Moreover, it is interesting to note that these links are usually together with links to Wikipedia or pages such as National Geographic.

The only antidote for the egocentrism  
of pure reason is Love.
